

Ready to **Launch...**  
Population mystery

Are you a **Home Explorer?**

- Research the population of your local town/city and the UK.
- Discover where the most/least densely populated places in the world are.
- Make an infographic about your local area.

# Why does population change?

## Expert knowledge:

- 'Population distribution' refers to how people are spread across the globe.
- 'Population density' measures how many people live within a defined area..
- People are living longer because of better access to healthcare and medicine.
- Birth rate is the average yearly number of babies born per thousand people.
- Death rate is the average yearly number of people dying per thousand people..

Time to **celebrate!**

Local fieldwork project.

## Wow moments

- Local field study work.
- Leading the junior Easter service.
- Learning about the life-cycles of different animal groups.
- Observing frogspawn develop into tadpoles.
